Lower Level

1 EFFORTLESS GARAGE

A two-car garage with unfinished shop space gives room for bikes, tools, and projects—while the water heater is tucked neatly into its own nook, keeping the space open and usable beyond parking.

2 ARRIVE, EXHALE

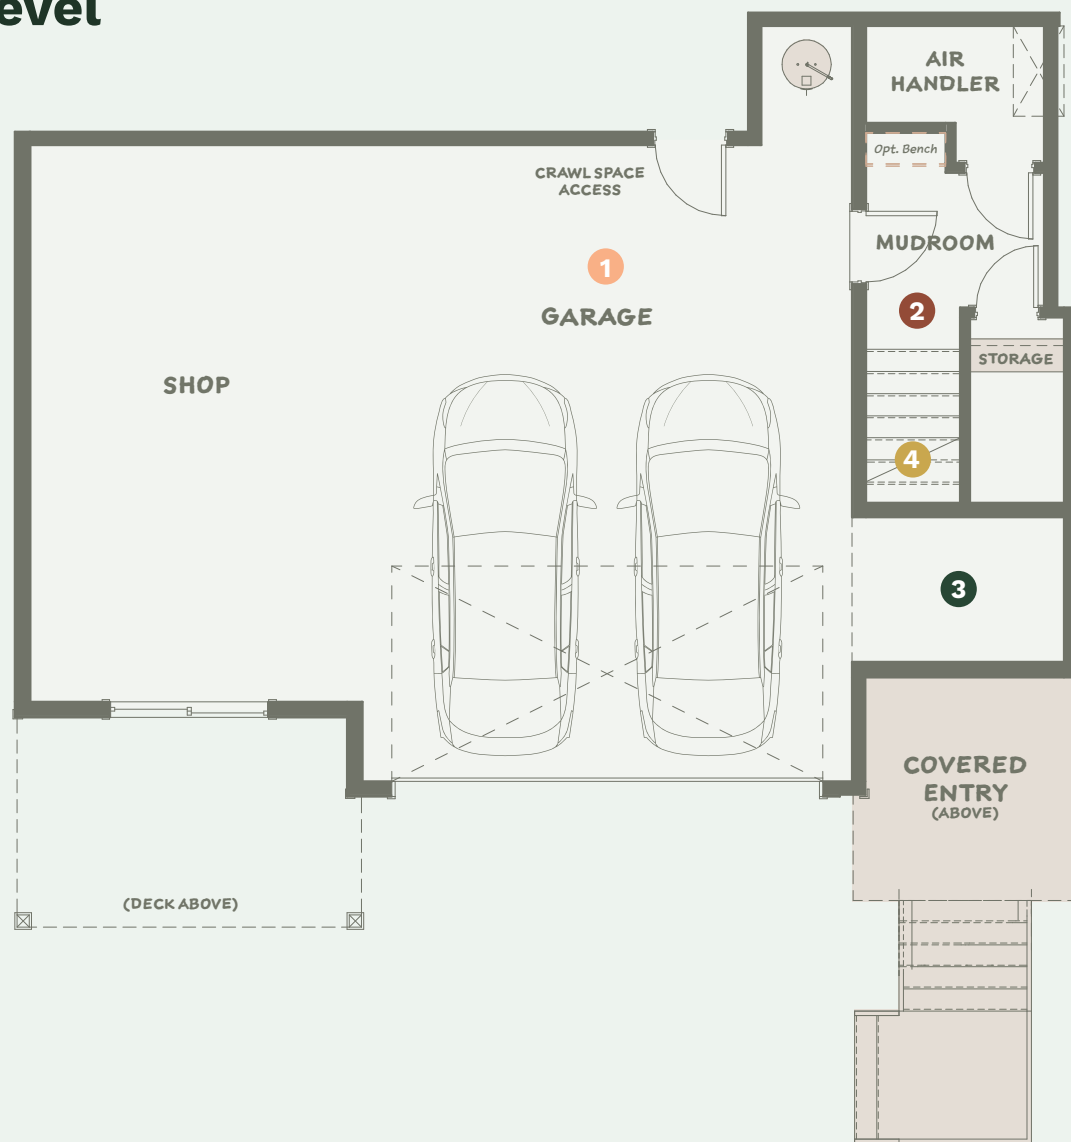

A mudroom with space for coats, shoes, and an optional bench gives everyone a place to land the moment they walk in.

3 MESS, CONTAINED

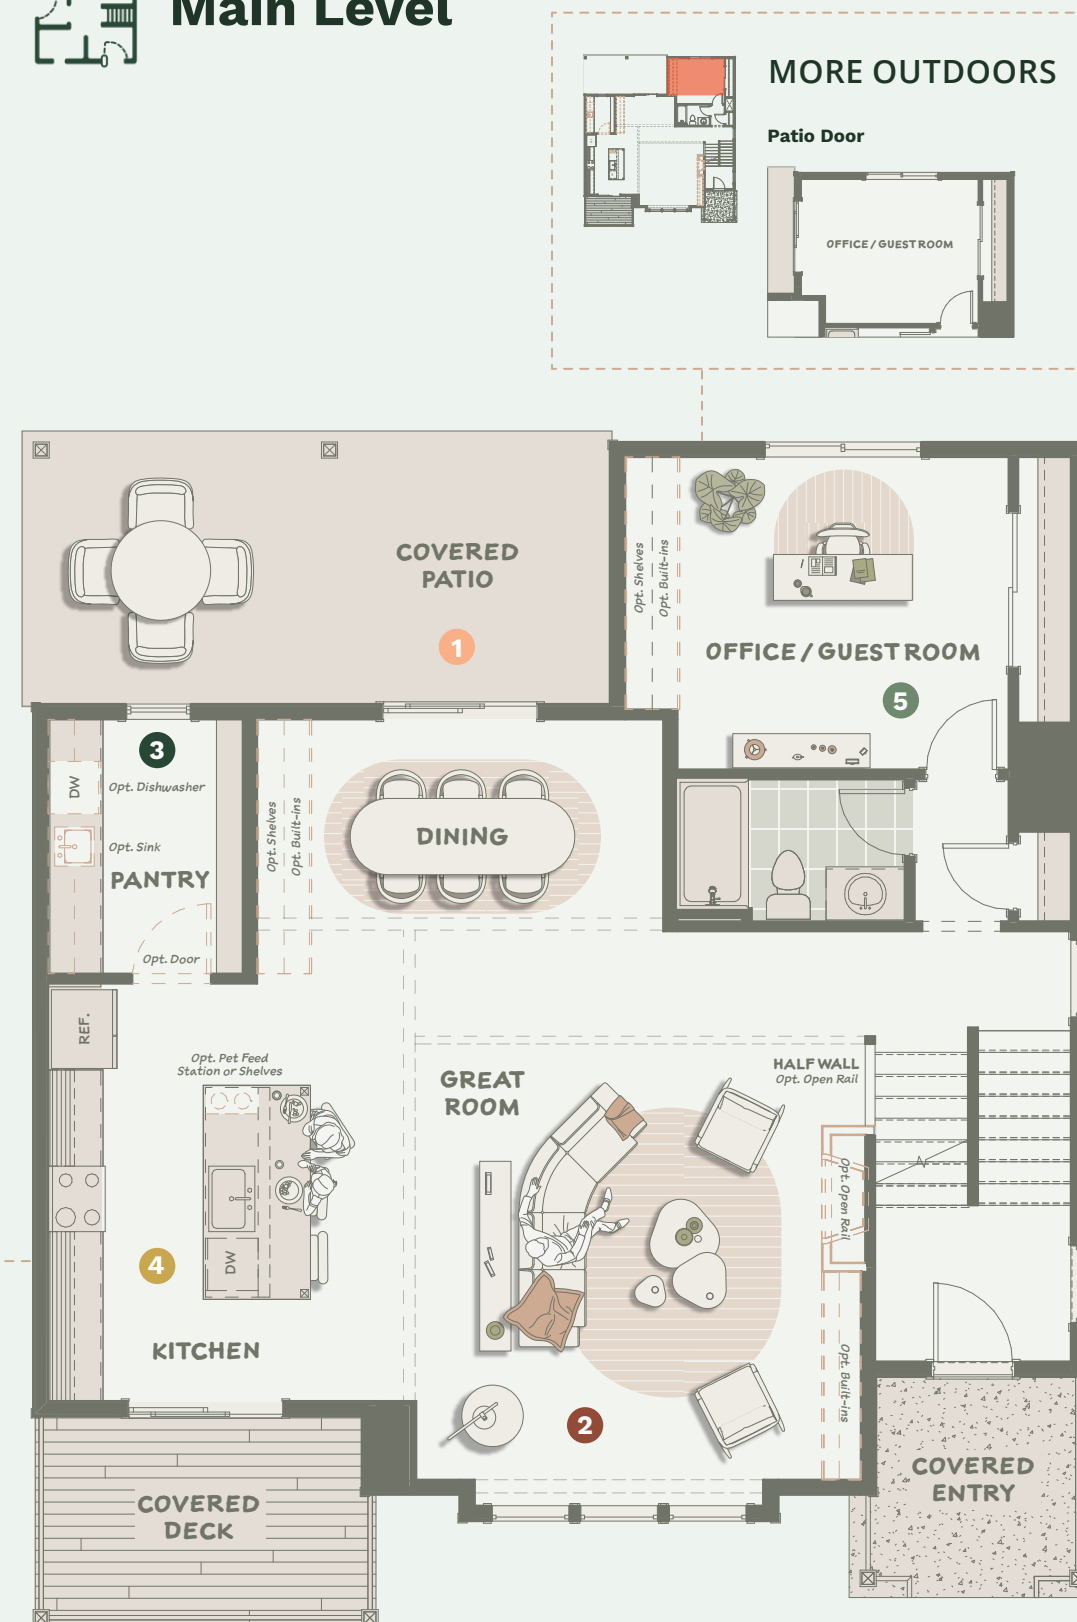

Flat garage space on this steep driveway makes it easy to store bins and cans, keeping everyday items accessible without cluttering other parts of your garage.

4 LIGHT-FILLED ENTRY

A spacious front entry with optional half wall and added windows creates a bright, open sense of arrival, welcoming from the start.

Main Level

1 PEACEFUL OUTDOORS

Covered patio and deck extend the main living space in two directions, offering the flexibility to enjoy views from both sides of the home. Picture sunset cocktails on the deck or a summer BBQ, which makes fresh air part of everyday routines, not just special occasions.

2 OPEN GREAT ROOM

The 2-story great room flows easily into the kitchen and dining area, creating a natural gathering space for family time, casual hosting, and everyday connection.

3 ORDER BEHIND THE SCENES

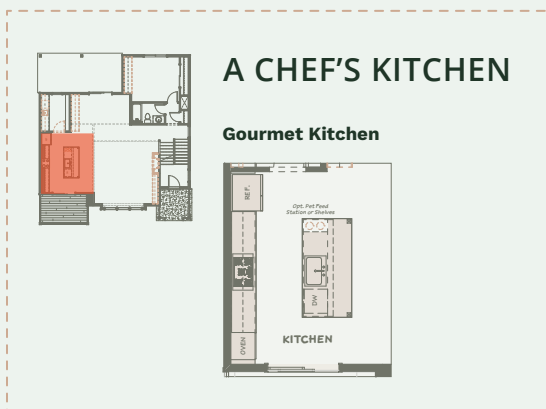

A prep space with a hybrid pantry offers abundant shelving, optional cabinets, and a window for natural light—making grocery days and meal prep calmer and more organized.

4 CALM KITCHEN

A walk-in pantry, generous prep space, and optional gourmet kitchen help meals, homework, and conversations happen together without crowding.

5 GUEST-READY FLEX SPACE

A main-level bedroom creates a quiet, comfortable space for daily use, with the added ease of a full bath nearby. When friends or family stay over, it becomes a convenient guest retreat.

Some homes feature alternate configurations that provide variety across each plan. Depending on construction progress, your home may already include some of these features. We'll help you explore what's available and guide you to a home that suits your needs and timeline.
